

NANAVU

SUSTAINABILITY CONCLAVE

Ideas in Dialogue,
Perspectives in
Focus

ORGANIZED BY
Campus Sustainability Council (CSC), TKMCE
KOLLAM

Panel Discussion
Technical Sessions
Expo
Ideathon

GUESTS INCLUDE :
Ar. Vinu Daniel
Ar.Eugene Pandala
Madhavan Namboothiri
P.B Sajan

Knowledge That Drives
Innovation

Explore Ideas,
Experience Innovation

Think Bold. Create Change.

Join us in making a positive
impact and beyond!

DESIGN, SUSTAIN, TRANSFORM.

01 About NANAVU

NANAVU is a sustainability-focused conclave that brings together students, architects, engineers, industry professionals, organisations, and sustainability practitioners to explore the future of the built environment. The conclave aims to move beyond sustainability as a theoretical concept by creating a platform for knowledge exchange, practical learning, innovation, and collaboration in sustainable construction.

02 About the Campus Sustainability Council (CSC) - TKMCE

The Campus Sustainability Council (CSC) brings together the students, families, and educators. Their aim is to provide a platform for collaboration, education, and innovation. It serves as a platform for collaboration, awarding, and action towards a greener and more responsible campus.

03 About Naamearth

Naamearth is a sustainability-driven initiative dedicated to advancing natural regenerative, and responsible approaches to sustainability. It combines traditional knowledge, contemporary engineering, research, and hands-on practice to explore solutions that are ecologically, affordable, resilient, and relevant to the future of construction.

04 What Happens at NANAVU

Nanavu empowers the next generation of architects, engineers, educators, researchers, and practitioners through experiential learning, research, workshops, and collaborative projects focused on sustainable building technologies and materials.

Nanavu believes the future of construction lies in both innovative technologies and skilled people who can apply them to create a more ecological, social, and regenerative built environment.
